

# MONIL SONI

## POWER BI DEVELOPER | DATA ANALYTICS

Vadodara, Gujarat | Open to Relocation & Remote | +91 99248 18208 | [sonimonil247@gmail.com](mailto:sonimonil247@gmail.com)  
[linkedin.com/in/sonimonil](https://linkedin.com/in/sonimonil) | [sonimonil.github.io](https://sonimonil.github.io)

### PROFESSIONAL SUMMARY

Power BI Developer with 3.5+ years of experience building end-to-end BI solutions on the Microsoft stack. Specialised in star schema data modelling, advanced DAX, Power Query (M), and SQL, with production ownership of Power BI Service — workspaces, apps, gateways, scheduled refresh, and Row-Level Security. Comfortable taking a semantic model from requirements through performance tuning to a governed self-service rollout used by 200+ business users.

### TECHNICAL SKILLS

**Power BI Development:** Power BI Desktop, DAX (time intelligence, calculation groups, dynamic measures, what-if parameters), Power Query (M), Semantic Model Design, Star Schema Modelling, Composite Models, Aggregations, Field Parameters, Incremental Refresh, Paginated Reports (SSRS)

**Model Optimisation:** Tabular Editor, DAX Studio, ALM Toolkit, Best Practice Analyzer, VertiPaq Analyzer, XMLA Endpoint, Query Plan & Storage Engine Tuning

**Power BI Service & Governance:** Workspace & App Lifecycle, Scheduled Refresh, Row-Level Security (RLS), On-Premises Data Gateway, Dataflows, Deployment Pipelines, Premium / PPU Capacity, Usage Monitoring, Git & Azure DevOps Integration

**SQL & Data:** Microsoft SQL Server (T-SQL), Azure SQL Database, MySQL, Query Optimisation (joins, CTEs, window functions, indexing, execution plans), Stored Procedures, Views, ETL, Data Cleansing & Validation

**Microsoft Fabric:** OneLake, Lakehouse, Warehouse, Direct Lake storage mode, Data Factory Pipelines

**Delivery:** Requirements Gathering, KPI Definition, Data Dictionary & SOP Standardisation, Stakeholder Management, UAT, Root-Cause Analysis, Copilot in Power BI, Power Automate

### PROFESSIONAL EXPERIENCE

#### Power BI Developer | Smart Minds

Nov 2024 – Present

- Re-architected enterprise semantic models into star schema and refactored inefficient DAX and Power Query (M) — replacing calculated columns with measures, removing bi-directional relationships, and enabling incremental refresh — **cutting dataset refresh time by 55%** and eliminating recurring scheduled-refresh failures in Power BI Service.
- Designed and implemented Row-Level Security roles mapping region, business unit, and reporting hierarchy onto a single governed dataset, delivering secure self-service access for **200+ users** without duplicating reports.
- Own Power BI Service end to end — workspace and app lifecycle, dataflows, on-premises gateway configuration, and refresh scheduling — delivering KPI dashboards over SQL and multi-source data that replaced the manual weekly status reporting cycle.
- Built Power Query (M) transformation pipelines and complex DAX measures (time intelligence, dynamic KPIs, what-if parameters), and introduced reconciliation checks that validate published figures against source systems before release.

#### Power BI Developer | PW (PhysicsWallah)

Mar 2023 – Oct 2024

- Built interactive Power BI dashboards mapping critical business pipelines for operations and business teams, **cutting report turnaround time by 50%**.
- Migrated legacy VBA and Excel-based reporting into automated Power BI datasets and dashboards, removing manual refresh work and giving stakeholders a single certified source of numbers.
- Modelled source data into star schema and authored DAX measures, Power Query (M) transformations, and tuned T-SQL against high-volume SQL Server tables to feed certified datasets.
- Standardised data definitions, KPI logic, and SOPs across regional units, resolving long-standing discrepancies between team-level and executive reporting.

#### Power BI / Reporting Intern | Rishabh Software

Jun 2022 – Nov 2022

- Mapped business requirements and built SQL automation scripts for high-volume data transformation, removing repetitive manual preparation from the reporting cycle.
- Produced visual reporting models that helped delivery teams isolate processing defects faster.

### KEY PROJECTS

- Predictive Sales Analytics Dashboard (Power BI)** — Modelled multi-channel marketing data into a star schema and built DAX-driven forecasting measures tracking cost-to-conversion to guide budget allocation.
- Resource Allocation & Performance Dashboard (Power BI)** — Built a dynamic dashboard over live and historic workforce metrics with what-if parameters to model optimal staffing under volatile demand.

### EDUCATION

**MBA, Business Analytics** | Parul University, Vadodara

2021 – 2023

**BBA, Information Systems Management** | Sardar Patel University, Vallabh Vidyanagar

2016 – 2019

### CERTIFICATIONS

- Business Intelligence Certification — Rishabh Software
- Corporate Readiness & Adaptability Program — BIT Baroda
