

MONIL SONI

POWER BI DEVELOPER

Vadodara, Gujarat, India | +91 99248 18208 | sonimonil247@gmail.com | [linkedin.com/in/sonimonil](https://www.linkedin.com/in/sonimonil)

PROFESSIONAL SUMMARY

Power BI Developer with 4+ years of experience building end-to-end BI solutions on the Microsoft stack. Specialised in star schema data modelling, advanced DAX, Power Query (M), and SQL, with production ownership of Power BI Service - workspaces, apps, gateways, scheduled refresh, and Row-Level Security (RLS). Cut dataset refresh time by 55% and report turnaround by 50%, and secured governed self-service access for 200+ users through RLS. Available to join immediately.

TECHNICAL SKILLS

- Power BI Development:** Power BI Desktop, DAX (time intelligence, calculation groups, dynamic measures), Power Query (M), Semantic Model Design, Data Modelling, Star Schema & Snowflake Schema, Composite Models, Aggregations, Field Parameters, Incremental Refresh, Paginated Reports (SSRS)
- Model Optimisation & Tooling:** Tabular Editor, DAX Studio, ALM Toolkit, Best Practice Analyzer, VertiPaq Analyzer, XMLA Endpoint, Query Plan & Storage Engine Tuning, Performance Optimisation
- Power BI Service & Governance:** Workspace Management, App Publishing, Scheduled Refresh, Row-Level Security (RLS), On-Premises Data Gateway, Dataflows, Deployment Pipelines, Premium / PPU Capacity, Usage Monitoring, Git & Azure DevOps Integration
- Databases & SQL:** Microsoft SQL Server (T-SQL), Azure SQL Database, MySQL, PostgreSQL, Snowflake, SQL Optimisation (joins, CTEs, window functions, indexing, execution plans), Stored Procedures, Views, ETL, Data Cleansing & Validation
- Microsoft Fabric:** OneLake, Lakehouse, Warehouse, Direct Lake storage mode, Data Factory Pipelines, Fabric Copilot
- Visualisation & Reporting:** Interactive Dashboard Design, KPI & Executive Reporting, Custom Visuals, Report UX, Tableau, Looker Studio, Excel (Power Pivot, VBA)
- AI-Assisted Analytics & Automation:** Copilot in Power BI, Microsoft Copilot, Natural-Language Q&A, Smart Narratives, LLM-assisted DAX/SQL drafting, Power Automate
- Delivery:** Requirements Gathering, KPI Definition, Data Dictionary & SOP Standardisation, Stakeholder Management, UAT, Root-Cause Analysis

PROFESSIONAL EXPERIENCE

Power BI Developer | Smart Minds | Nov 2024 - Present

- Re-architected enterprise semantic models into star schema and refactored inefficient DAX and Power Query (M) using DAX Studio and Tabular Editor, cutting dataset refresh time by 55% and eliminating scheduled refresh failures in Power BI Service.
- Designed and implemented Row-Level Security (RLS) roles mapping region, business unit, and hierarchy to a single governed dataset, delivering secure self-service access for 200+ users without duplicating reports.
- Owned Power BI Service end to end - workspace and app lifecycle, dataflows, on-premises gateway configuration, and refresh scheduling - delivering real-time KPI dashboards over SQL and multi-source data that replaced manual status reporting and saved 12 hours per week.
- Built Power Query (M) ETL pipelines and complex DAX measures (time intelligence, dynamic KPIs, what-if parameters) that raised reported data accuracy to 99% and reduced ad-hoc reporting requests by 40%.

Power BI Developer | PW (PhysicsWallah) | Mar 2023 - Oct 2024

- Built interactive Power BI dashboards mapping critical business pipelines, cutting report turnaround time by 50% for business and operations teams.
- Migrated legacy VBA and Excel reports into automated Power BI datasets and dashboards, saving 20 hours per week and reducing report prep effort by 60%.
- Modelled source data into star schema and authored DAX measures, Power Query (M) transformations, and tuned T-SQL against high-volume SQL Server tables to feed certified datasets.
- Standardised data definitions, KPI logic, and SOPs across regional units, reducing reporting discrepancies by 35%.

Power BI / Reporting Intern | Rishabh Software | Jun 2022 - Nov 2022

- Mapped business requirements and built SQL automation scripts for high-volume data transformation, reducing manual intervention by 50%.
- Produced visual reporting models that helped delivery teams isolate processing defects faster.

KEY PROJECTS

Predictive Sales Analytics Dashboard (Power BI) - Modelled multi-channel marketing data into a star schema and built DAX-driven forecasting measures to track cost-to-conversion and guide budget allocation.

Resource Allocation & Performance Dashboard (Power BI) - Built a dynamic dashboard over live and historic workforce metrics with what-if parameters to recommend optimal staffing under volatile demand.

EDUCATION

MBA, Business Analytics | Parul University, Vadodara | 2021 - 2023

BBA, Information Systems Management | Sardar Patel University, Vallabh Vidyanagar | 2016 - 2019

CERTIFICATIONS

- Business Intelligence Certification - Rishabh Software
- Corporate Readiness & Adaptability Program - BIT Baroda
